

First phase of the East Asia VLBI network

A. Miyazaki, H. Kobayashi, et al. (Mizusawa VLBI Observatory)
, KVN group (KVN/KASI), SHAO VLBI group (SHAO/CAS)

East Asia VLBI network (EAVN)

Korea : KVN ([Yonsei](#), [Ulsan](#), [Tanma](#))

China : CVN ([Shanghai](#), [Urumqi](#), Beijing, Kunming)

Japan : JVN+VERA

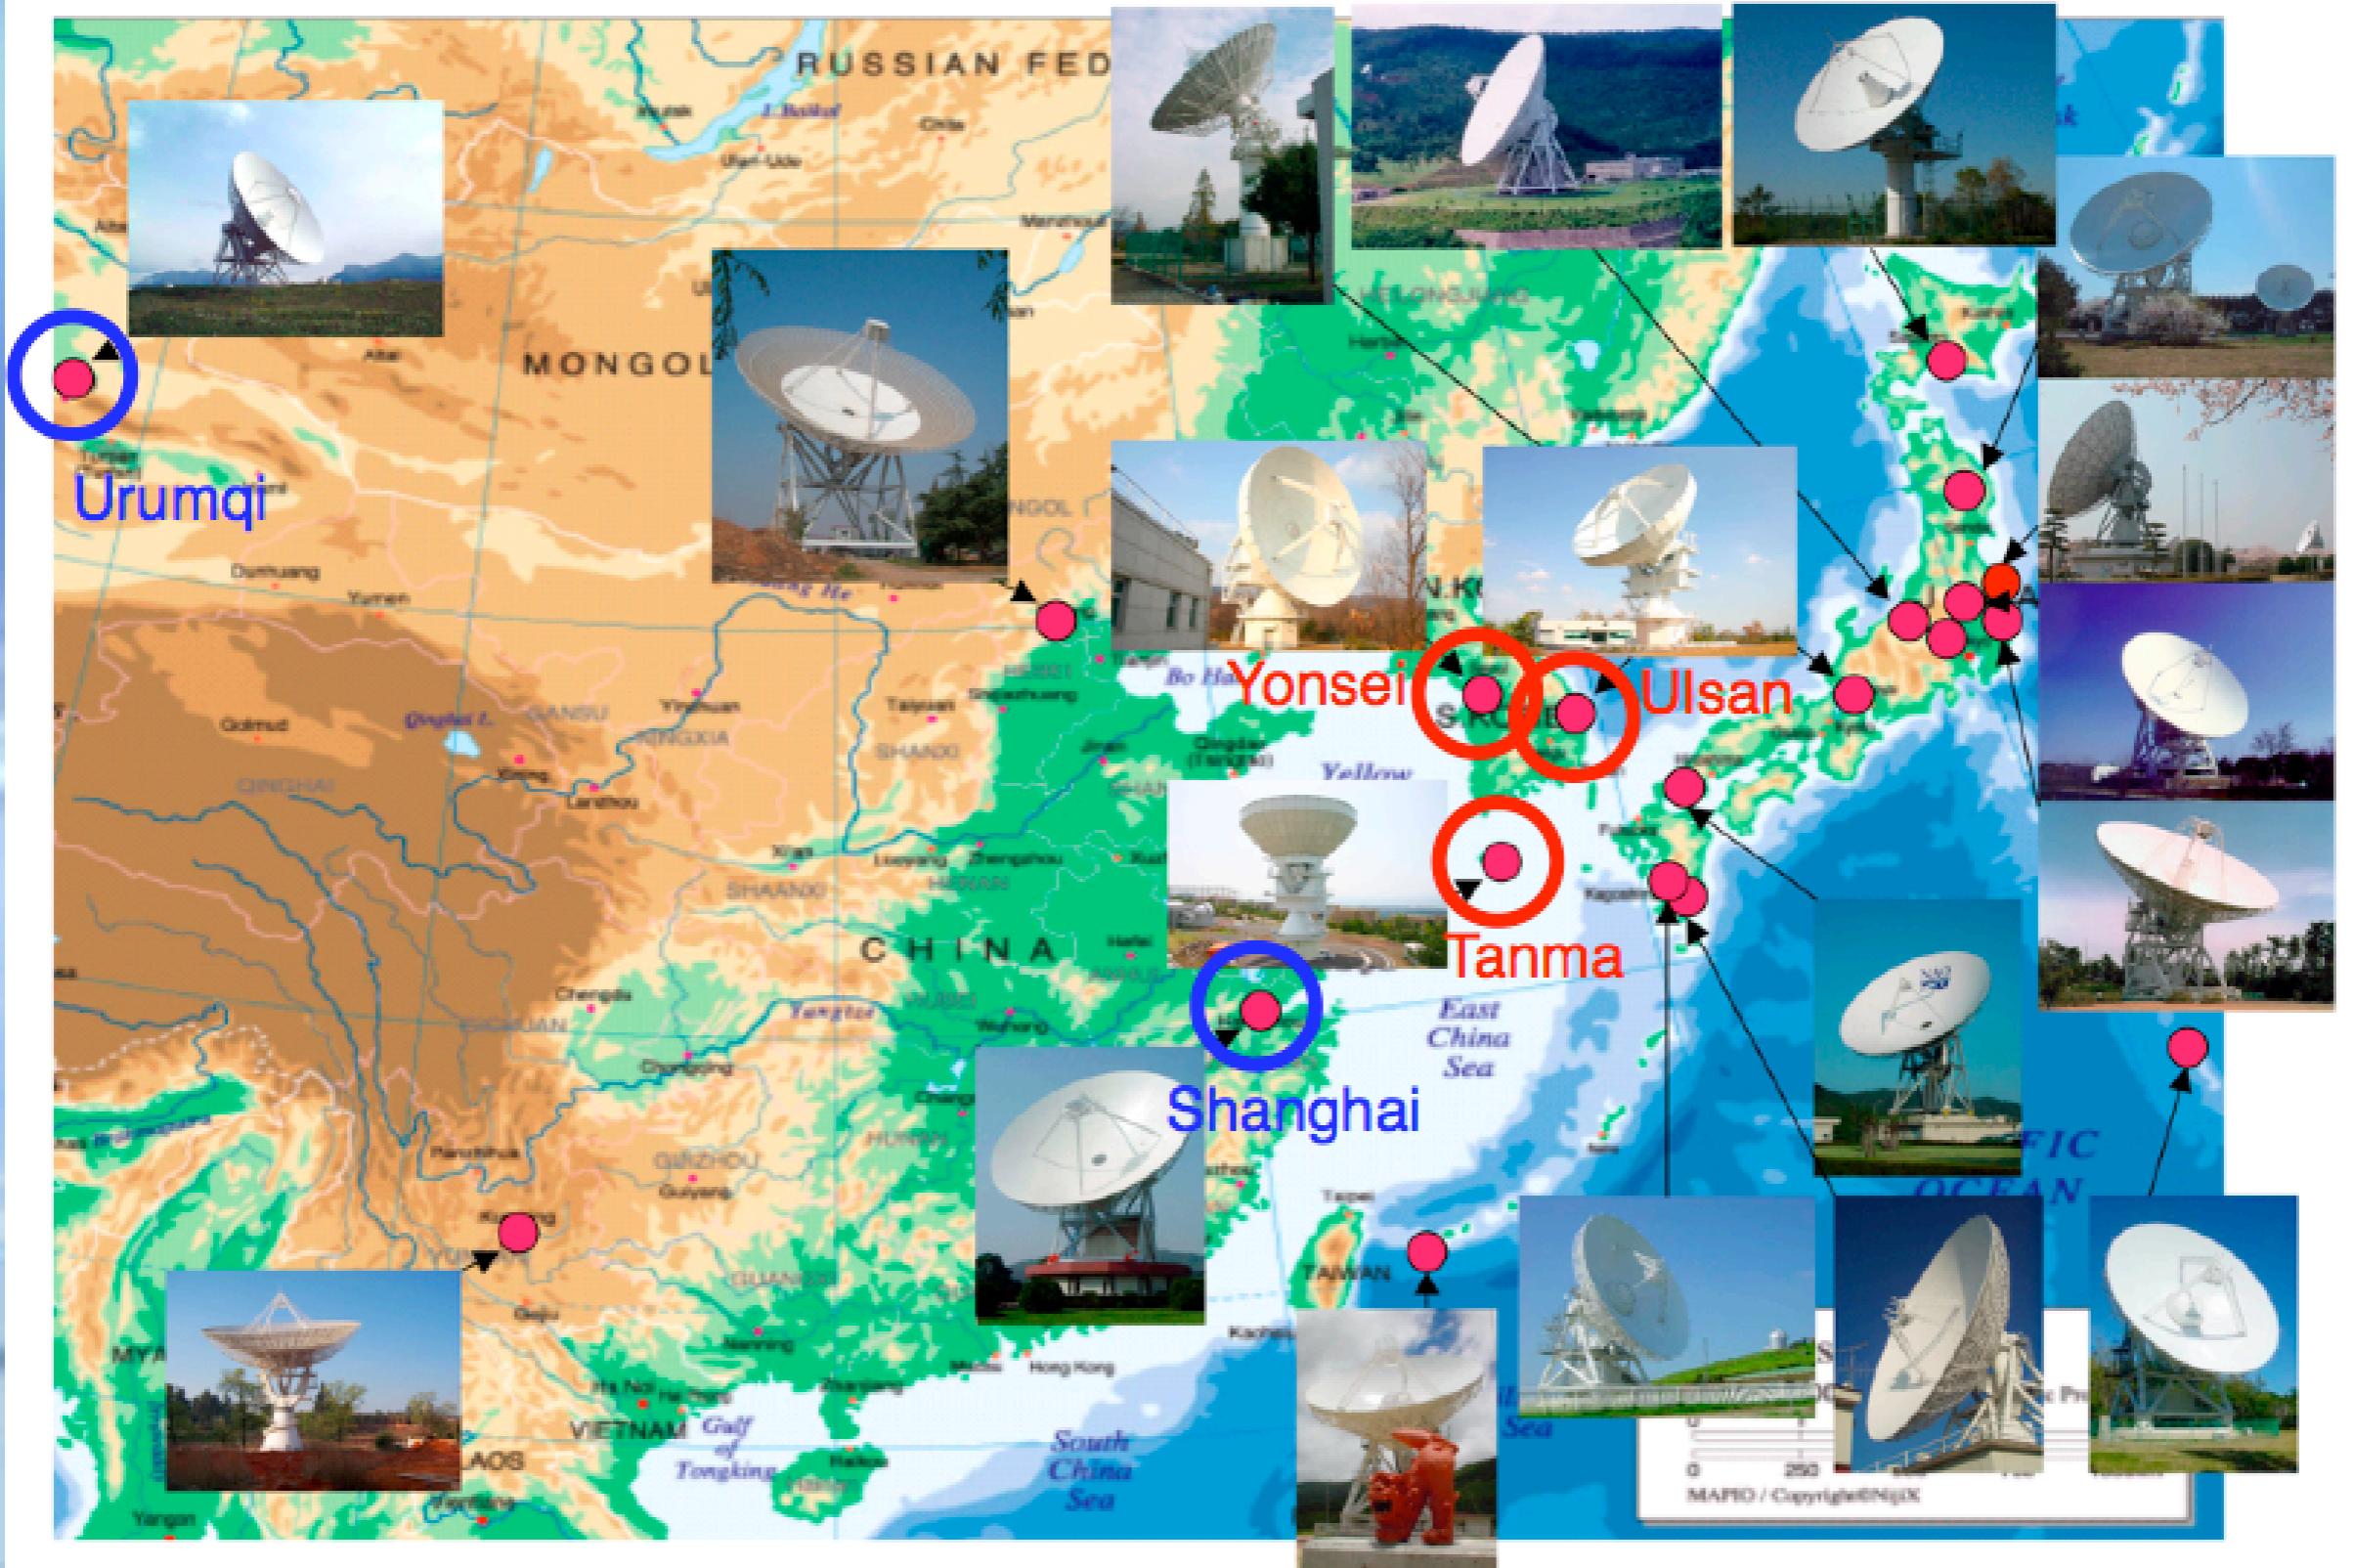

The EAVN will be powerful tool for astrometry observation.

We are going to install “*K4/VSOP terminal* (128Mbps)” on KVN 3 antennas in Korea and Shanghai & Urumqi in China in order to construct the first phase East Asia VLBI network.

In the future

- Extension to the wideband (Gbps recording) system
and the KJJVC (Korea-Japan Joint VLBI correlator)
- VSOP-2

East Asia VLBI Network array configuration

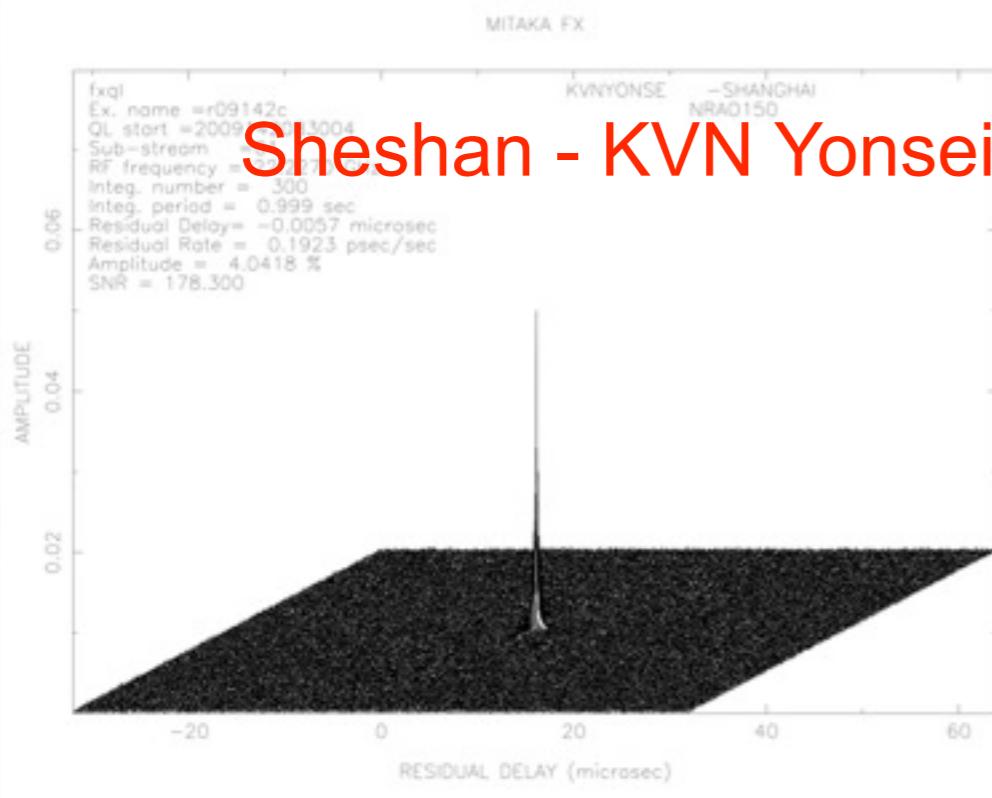

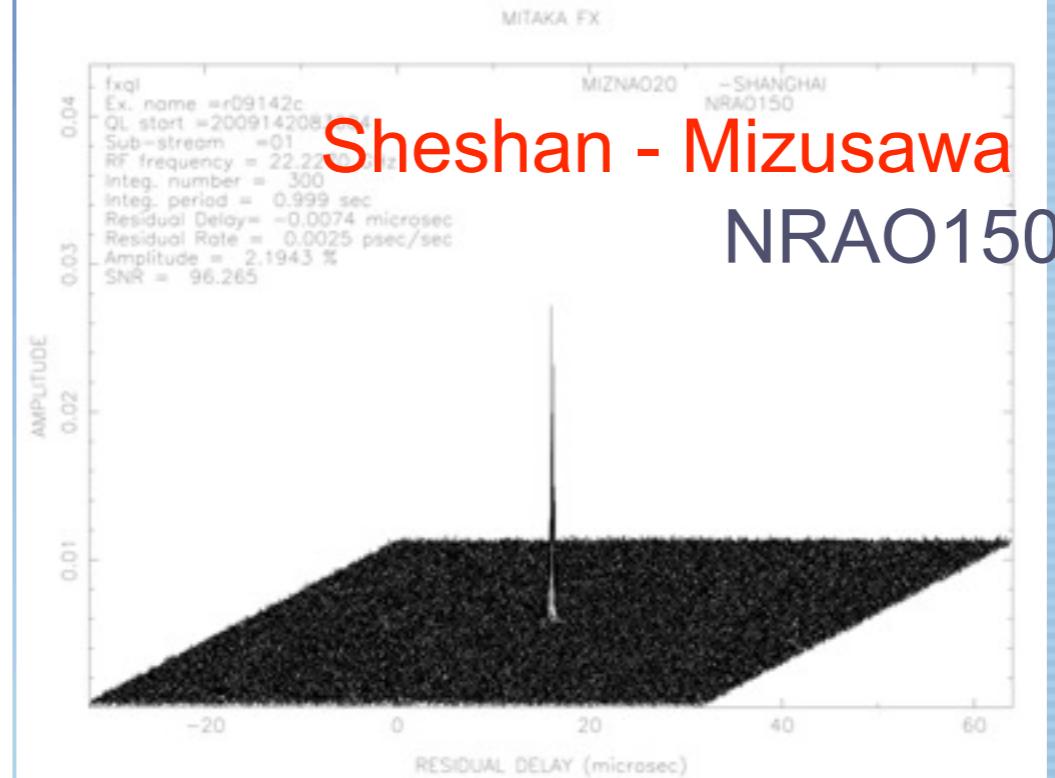

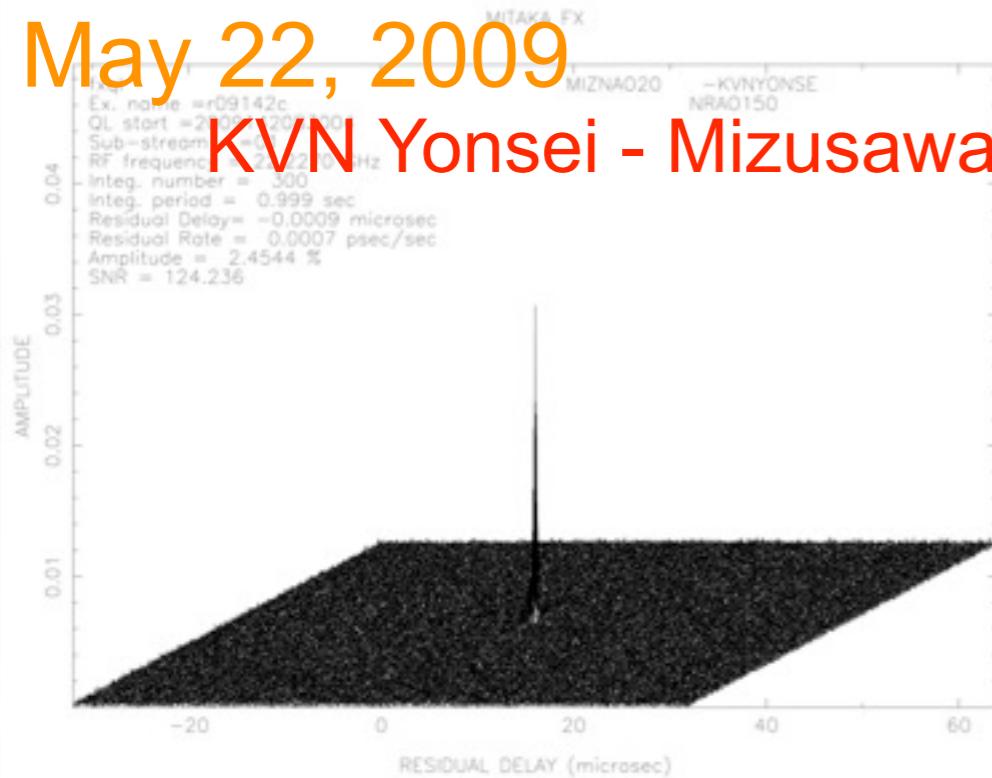

max. baseline ~6,000km

Fringe detections for EAVN

KVN Yonsei(Seoul) - Sheshan(Shanghai) - VERA Mizusawa K-band

May 22, 2009

Fringe Detections

- Nov. 1 and 3, 2008 in the K-band
[KVN Yonsei+VERA K-band](#)
- Mar. 12 and 13, 2009 in the Q-band
[KVN Yonsei+VERA Q-band](#)
- May. 22, 2009 in the K-band
[KVN Yonsei+Sheshan+VERA K-band](#)
