# Charge to the Review Panel

Peter Napier  
EVLA Project Manager

# Charge to the Committee

---

The purpose of the CDR of an EVLA Subsystem is principally to review 4 questions:

- (1) Are the detailed requirements for the subsystem complete and adequate?
- (2) Will the design selected for implementation meet the requirements?
- (3) Are interfaces to other subsystems defined adequately and completely?
- (4) Has adequate attention been given to the production and maintenance of the equipment.
