

Charge to the Committee

Review of SSS Readiness for EVLA Shared Risk Observing, June 5, 2009

Mark McKinnon
EVLA Project Manager

Atacama Large Millimeter/submillimeter Array
Expanded Very Large Array
Robert C. Byrd Green Bank Telescope
Very Long Baseline Array

Charge

- Are the detailed scientific and technical requirements for SSS software for SRO complete and adequate?
- Will the design selected for implementation meet the requirements?
- If there are interfaces between software tools and to any other EVLA subsystem, are they defined adequately and completely?
- Has adequate attention been given to how the software tools will be produced and maintained?
- Is the schedule for the delivery of the software tools for SRO understood, properly resourced, and achievable?
