1. 5 Billion years ago a giant gas CLOUD has too much gravity and collapses!

2. The sun forms in the middle of the CLOUD which is now shaped like a pancake or DISK.

3. Planets form like snowballs as they move around the DISK.

4. Soon the DISK is all gone and only the SOLAR SYSTEM is left.

5. In 5 Billion years, the SUN will become a RED GIANT STAR. Look out, Earth!

6. The outside of the RED GIANT STAR will make a beautiful NEOBULA.

7. All that is left is a tiny WHITE DWARF STAR as big as the Earth!

THE END

THE LIFE OF THE SUN
How to fold a mini comic book!

1. Fold in half, Hamburger-style

2. Cut along the dotted line

3. Unfold

4. Fold in half, Hotdog-style

5. Pinch the two ends and push them together

6. The top of the paper should make a cross shape

7. Crease the pages flat, and fold them so that your cover is at the front. Hooray! You are done!
