

**"Engineers think that equations approximate the real world.
Scientists think that the real world approximates equations.
Mathematicians are unable to make the connection." – Anon**

"They say that something as small as a butterfly beating its wings in China can cause a hurricane in America, so maybe we should go to China and kill all the butterflies, just to be safe." — Ken Advent on Chaos Theory

Despite the cost of living, have you noticed how popular it remains?

"Crash programs fail because they are based on theory that, with nine women pregnant, you can get a baby in a month." — Wernher von Braun

"If you are listening to a rock star in order to get your information on who to vote for, you are a bigger moron than they are." - Alice Cooper, rock star

I wonder how much deeper the ocean would be without sponges.

"If it wasn't for the last minute, much wouldn't get done." – Anon

"As far as the laws of mathematics refer to reality, they are not certain; and as far as they are certain, they do not refer to reality." - Albert Einstein

"Entropy isn't what it used to be." - Anon

A day without sunshine is like, night.

"If you want total security, go to prison. There you're fed, clothed, given medical care and so on. The only thing lacking... is freedom. " -- Dwight D. Eisenhower

"The lottery is the tax that the government places on people for being mathematically ignorant" – Gallagher

A conclusion is the place where you got tired of thinking.

"If there's a 50-50 chance something can go wrong, then 9 out of 10 times it will." - Yogi Berra

"We only use 10 percent of our brains, Imagine how much we could accomplish if we used the other 60 percent." -- Ellen DeGeneres

"Some ideas are so stupid, only an intellectual could believe them" (George Orwell)

Atheism is a non-prophet organization.

"Simulations are not data." – Anon
